

RIFLE SCOPES

In the development of our rifle scopes we have always taken our cue from the practical challenges which you as a hunter are faced with. At the same time, the protection of tradition in hunting is just as important to us as the technical enhancement of our rifle scopes.

Z6/Z6i

The innovative 6x zoom from Swarovski Optik offers a unique range of magnification and field of view. This results in greater flexibility when hunting, without compromising either image quality or design. Hidden behind the elegant appearance of the Z6 is state-of-the-art technology that has revolutionized the practical benefit of a rifle scope. The larger zoom range and the greater eye relief allow for more flexibility, greater precision and increased safety when hunting. The rifle scopes of the Z6 generation are now available in eight different types of main tubes. Some models also available by special order in our rail design (SR), not all SR models available in US. Above 15x magnification, the rifle scopes are fitted with HD lenses and third turret parallax for accurate shooting at long distances. These models are also optionally available with our ballistic turret (BT). You will find a rifle scope perfectly tailored to your needs depending on what you intend to use it for.

Z5

Lightweight, Slim, High-Precision, the 1 inch rifle scope with 5x zoom. HIGH MAGNIFICATION MEETS LARGE FIELD OF VIEW The Z5 from SWAROVSKI OPTIK is a 1-inch rifle scope with 5x zoom – an innovative combination. Due to its high magnification and its large field of view, it is particularly versatile and eminently suitable for various types of hunting. The Z5 offers exceptional optical performance in a slim rifle scope.
