## **Model 76 Classic 300WM Deluxe Pkg.**

**Serial #WC300CDX  
244-01001**

The Dakota® Model 76 Classic™ is the entry level Model 76™, the first choice for someone seeking the strength of the Model 76 action, planning to use the rifle with optics rather than open sights and desiring a simpler trim stock.

Feature controlled round feeding and positive extraction; the extractor, underneath the locking lug and positioned at the end of the bolt, opens fully to insure that the next round feeds smoothly. The three-position safety allows the bolt to be operated with the safety on. The one-piece trigger guard and hinged floorplate are machined from solid bar stock. Every Dakota 76 can be custom-tailored to your size and tastes, with a wide range of optional features available.

Standard Features: XX grade English walnut, hand-rubbed oil finish, point panel checkering, Dakota swivel studs, 13 5/8" length of pull, black recoil pad, 23" barrel, Two panel checkering.
